

ADDING A CATEGORY OF ACCREDITATION

If you are adding a category, for example, a second Food-Producing Animal Mobile or a Companion Animal Mobile (housecall service) to your existing facility, an inspection of the new category is required.

CHANGING A CATEGORY OF ACCREDITATION

If you are changing the category of accreditation, for example, upgrading from a Companion Animal Office to a Companion Animal Hospital or changing an Equine Mobile to a Food-Producing Animal Mobile, an inspection of the new category is required.

Please contact the Accreditation Co-ordinator at the CVO office if you are planning on adding or changing a category of accreditation. An application form, a sample inspection form and other information relating to the particular category can be obtained from the CVO website.

Please note that some category changes may require renaming the facility as required in Ontario Regulation 1093.
