

PREPARATION IS KEY for a successful inspection

A successful inspection meets all the standards, and demonstrates that your facility provides a safe environment for animal care!

Apply for your inspection

The application form is in the Professional Practice Portal.

Prepare for your inspection

Filling out an inspection checklist, which you can find on our website, can help you conduct a mock inspection before the College's inspection. You can get your entire team involved in this mock inspection process.

Be attentive to the following inspection issues:

- Are your controlled drug audits done every month?
- Are your expired, contaminated or damaged drugs stored separately from non-expired drugs?
- Are your controlled drugs securely stored at all times?
- Are you properly disposing of controlled and non-controlled drugs?

Time spent preparing for a successful inspection helps ensure compliance with the standards. You can contact the accreditation team if you have questions - they are happy to help!

A successful inspection

Congratulations on your commitment to safe, quality veterinary medicine!
